

Vi TECHNOLOGY Receives Award for Sigma Review Software at APEX

Saint-Egrève, France, February 2015 — Vi TECHNOLOGY, a leading provider of inspection solutions for PCB assembly, announces that it has been awarded a 2015 NPI Award in the category of Software – Process Control for its Sigma Review Software. The award was presented to the company during a Tuesday, Feb. 24, 2015 ceremony that took place at the San Diego Convention Center during the IPC APEX EXPO.

Sigma Review is a new Web-based multi-step, multi-line review software.

By displaying & correlating both SPI and AOI data and images, including reference images, Sigma Review opens the way to defect root cause analysis.

In addition, predefined IPC defect categories offer a simple and robust classification environment. Based on the classified defects, Sigma Review

can suggest corrective actions for the operator.

Premiering in 2008, the NPI Awards program is an annual celebration of product excellence in electronics surface mount assembly. Premier products based on the finest examples of creative advancement in technology are chosen by a distinguished panel of industry experts.

About Vi TECHNOLOGY

Vi TECHNOLOGY is a global designer, manufacturer and supplier of a wide range of innovative inspection equipment and software solutions for PCB assembly. Vi TECHNOLOGY serves very demanding market segments including telecoms, consumer, computer, automotive, infrastructure, industrial and medical.
