

# Stands

JBC's stands feature a line-up covering the variety of JBC's Advanced Series tools. The stands are placed between the control unit and the tool for optimum performance, like temperature reduction in sleep mode when the tool is placed in the stand for extended tip-life and less oxidation.

The cartridge extractor system featured in the stands AD-SB and DN-SB offers switching cartridges without the need to interrupt your work.

All stands can be connected to all Modular line stations.

## AD-SB

For T210-A & T245-A handpiece
