

Kester was awarded Global SMT's [Global Technology Award](#) in the category of Flux for SELECT-10™ Selective Solder Flux. The award was presented during Productronica which was held in Munich last month.

SELECT-10™ Selective Solder Flux is a zero-halogen no-clean liquid flux designed specifically for the needs of the selective soldering process. As part of Kester's portfolio of high reliability products, SELECT-10™ has passed IPC SIR testing as a raw and partially activated flux. Specific to selective soldering, SELECT-10™ does not spread beyond the spray pattern and will not clog the fluxer head.
