PDR Receives Global Technology Award for Rework & Repair

Shingle Springs, CA — November 2019 — PDR announces that it was awarded a 2019 Global Technology Award in the category of Rework and Repair Equipment for its E6S Evolution Rework System. The award was presented to the company during a Tuesday, Nov. 12, 2019 ceremony that took place during productronica in Munich, Germany.

Defense entities, contract manufacturers, research and telecom customers have identified PDR's E6 technology as the system of choice for the machine's ease of use, effective rework and flexibility to tackle a wide range of applications. Priced below fully automated systems, PDR's simple design and easy to master rework systems are built to ensure that they are virtually maintenance free, offering years of useful service with many PDR systems built in the 1980s still in service.

PDR's Gantry Level Focused Infrared Rework System Model E6S is designed to rework PCBs up to 24" (610mm). PDR's unique gantry design offers full rework access to devices placed on the leading edges of medium to large PCB formats in a simple and convenient to use rework system.

PDR's E6 series utilizes PDR's patented Focused IR Rework Technology with visible IR component targeting as well as infrared pre-heating from below for superior thermal balancing of the PCB during the rework process.

Premiering in 2005, the Global Technology Awards program is an annual celebration of product excellence in electronics surface mount assembly. Premier products based on the finest examples of creative advancement in technology are chosen by a distinguished panel of industry experts.

PDR Rework Systems remains at the forefront of rework technology by providing air nozzle free systems with advanced in-process control features and visible light that takes the guesswork out of rework. PDR X-Ray Solutions was founded in 2012, distributing and supporting X-Ray Solutions for industry under the PDR Brand as well as other well-known X-Ray Brands.
