

## News Release

### Yamaha Wins Global Technology Award for Printing Equipment

*Advanced high-end printer, YSP10, praised for innovative high-speed, low-waste design*

Yamaha Motor Europe SMT Section has received Global SMT's Global Technology Award 2019 in the printing equipment category, for the YSP10 high-end solder paste printer, presented at the Productronica Forum in Munich on November 12, 2019.

The Global Technology Awards recognise innovations that improve manufacturing performance and environmental consideration. The YSP10 achieves both by introducing enhanced motion control that reduces cycle time by 20%, optional features that automate product changeovers, and an advanced head design that minimises cleaning paper usage.

Mr Ryosuke Nakamura, Branch Manager, Yamaha Motor Europe IM Business, with the award-winning YSP10 screen printer.
